

INTRODUCTION

Welcome to the newest and coolest family of anime characters!
They might be mini but their success will be mighty!

A fully decentralized community driven token, built on the
Ethereum network, the only place for a project like this should be!

\$MiniKishimoto Inu will have its own uniquely designed NFT
characters that players will be able to use within our high spec P2E
fighting game.

PROBLEM SOLVING

The team behind MiniKishimoto understand that there are several areas within DeFi that just don't work for its consumers, and we want to use this project to work at bettering these problems.

PROBLEMS

Trust is a huge issue within many DeFi projects. The DeFi space is full of Rug Pulls, scams and overpromised projects that lead investors down a black hole. We understand that it is incredibly important for investors to have trust within projects they invest their hard-earned money into.

SOLUTIONS

To ensure full trust in our project there are a few things that we at MiniKishimoto will guarantee:

1. Our team will leave no question or query unanswered.
2. Frequent Voice chats within the telegram, involving Devs.
3. We will **NEVER** promise something unless we know that it can be delivered.
4. We will ensure full transparency of our workings on the project, so that the community is informed every step of the way.

NFT'S

As we stated from launch, when we reach 10M MC the top 5 holders will each receive 1 NFT from the first collection. These will be the rarest NFT's available within the Project and the holders will be the only players to use these in the P2E game.

NFT'S

- Many more collections of well-designed MiniKishimoto NFT's to come
- Eventually we will create a 10,000 NFT release, once the P2E game becomes widely adopted
- Professional NFT designers continually working on new ideas for collections
- Gamers will be able choose from an array of NFT characters to use in the game

P2E GAME

This is our most exciting aspect of the MiniKishimoto project, and we can't wait to unleash this truly epic gaming experience to our community and into the cyrptosphere!

The concept of this game is simple yet creates an extremely entertaining and competitive experience for users. It takes inspiration from the infamous 'Street Fighter' series that set the gaming world alight! You will compete with other users to win prizes, in game accessories and earn rewards.

P2E GAME

The more successful you are, the more rewards you will earn! Every fight will be an opportunity to earn MiniKishimoto tokens.

In order to be eligible to play the Game users will need to hold MiniKishimoto, this ensures the growth of the \$Minikishimoto token, making every investor benefit from the token's unique utility. As the game grows, the token grows!

TOKENOMICS

- 1 Trillion Supply
- 100% Of Tokens Added To Liquidity
- Liquidity Locked
- Renounced Ownership
- 8% Marketing Wallet per TX – Used for marketing and development
- 2% Redistribution per TX – Earn miniKishimoto rewards in your wallet just by holding
